FIREBOX T25

Available with optional integrated Wi-Fi 6 wireless module
Up to 3.14 Gbps firewall throughput, 5 x 1Gb ports, 10 Branch Office VPNs

ENTERPRISE-GRADE SECURITY FOR SMALL AND HOME OFFICES

Designed to protect enterprise users where they connect – in the small office/home office – the Firebox T25 allows businesses to extend powerful network security to the remote workforce. With more features than any other small form-factor UTM firewall in its class, the Firebox T25 is a cost-effective security powerhouse that delivers enterprise-grade security in a small package.

> *"I've been using WatchGuard for 14 years, and I've never had any reason to change that because WatchGuard continues to innovate and give me what I need and what my customers need."*

PROTECT WHERE YOU CONNECT

WatchGuard Firebox T25 is a small form-factor appliance that brings big security to any environment your users connect from. Perfect for home and small office networks, Firebox T25 is a cost-effective security powerhouse that delivers a complete and industry-best set of threat management solutions, including gateway antivirus, content & URL filtering, antispam, intrusion prevention, and application control, all in an easy-to-manage package.

QUICK AND SIMPLE DEPLOYMENT

Zero-touch deployment makes it possible to eliminate much of the labor involved in setting up a Firebox to connect to your network - all without having to leave your office. A robust, Cloud-based deployment and configuration tool comes standard with WatchGuard Firebox appliances. Local staff connects the device to power and the Internet, and the appliance connects to the Cloud for all its configuration settings.

UNIFIED SECURITY PLATFORM® ARCHITECTURE

WatchGuard's Unified Security Platform framework is built from the ground up to enable a single console solution for provisioning, deploying, managing, and monitoring an integrated portfolio of advanced cybersecurity solutions and services. This comprehensive portfolio of endpoint, multi-factor authentication, Wi-Fi, and network security solutions (including Firebox firewall appliances) helps stop the attempted discovery and exploitation of vulnerable systems, phishing, ransomware, intrusions, and advanced malware across all users, environments, and devices. Our Unified Security Platform architecture replaces the old patchwork security approach and makes it possible to extend security capabilities to every computing environment where your business operates.

NETWORK OPTIMIZATION WITH SD-WAN

The Firebox T25 makes network optimization easy. With integrated SD-WAN, you can decrease your use of expensive MPLS or cellular connections and inspect traffic from small offices while improving the resiliency and performance of your network.

FEATURES & BENEFITS

- 5 Gigabit Ethernet ports support high-speed LAN backbone infrastructures & gigabit WAN connections.

- Wi-Fi capable Firebox T25-W supports the 802.11ax Wi-Fi 6 standard, ensuring fast speeds for your users.

- All logging and reporting functions included with purchase, with over 100 dashboards and reports including PCI and HIPAA.

[1] Throughput rates are determined using multiple flows through multiple ports and will vary depending on environment and configuration. Max firewall throughput tested via direct connection using 1518 byte UDP frame based on RFC 2544 methodology. All testing performed on Fireware version 12.6.

[2] UTM throughput is measured using HTTP traffic with AV, IPS, and Application Control enabled, and does not account for all security services available on the appliance.

[3] HTTPS throughput is measured per NetSecOPEN methodology - 256k response with TLS1.2 AES256 + SHA-256.
